

### PREGNANCY PROBABILITY AT NOVA IVF

Our success rates are monitored by the Society for Assisted Reproductive Technology, under the auspices of the Centers for Disease Control and Prevention (CDC).

Since NOVA's inception in October, 1987, our pregnancy rates have *consistently* been well above average for both in California and nationwide.

Most couples can substantially increase their likelihood of a live birth if they plan to do more than just one cycle of treatment. A treatment cycle represents completion of ovarian stimulation, egg retrieval and embryo transfer.

The following graph illustrates the increase in live birth probability if you decide to have more than one cycle of treatment.

In this example, we used an arbitrary 35% live birth probability per treatment. Your actual likelihood of a live birth could be higher or lower.

### NOVA IVF LIVE BIRTH PROBABILITY October 1987 through Present

The following tables show our diagnosis-dependent probabilities of a live birth per completed cycles of treatment. These probabilities do not include frozen embryo pregnancies. Once all frozen embryos are thawed and transferred, there will be a substantial increase in the percentages of pregnancies.

#### In Vitro Fertilization

Female Age	One Treatment Cycle	Two Treatment Cycles*	Three Treatment Cycles*	Four Treatment Cycles*
<b>Under 35</b>	37-62%	52-77%	65-85%	74-88%
<b>35 to 37</b>	32-48%	45-64%	56-74%	66-80%
<b>38 to 40</b>	24-38%	35-54%	43-62%	49-67%
<b>41 to 42</b>	16-27%	20-37%	23-43%	25-47%
<b>Over 42</b>	8-14%	10-20%	11-25%	12-29%

\* Multiple cycle fee plan is available.

### Oocyte Donation

Donor Age	One Treatment Cycle	Two Treatment Cycles*	Three Treatment Cycles*	Four Treatment Cycles*
<b>Under 35</b>	55-78%	71-85%	81-88%	86-90%
<b>35 to 37</b>	40-65%	55-78%	66-83%	74-86%
<b>38 to 40</b>	28-42%	41-59%	49-66%	55-71%
<b>41 to 42</b>	20-30%	27-42%	31-48%	34-51%
<b>Over 42</b>	13-17%	19-25%	23-32%	27-37%

\* Multiple cycle fee plan is available.

### Gender Selection

Female Age	One Treatment Cycle	Two Treatment Cycles*	Three Treatment Cycles*	Four Treatment Cycles*
<b>Under 35</b>	37-62%	52-77%	65-85%	74-88%
<b>35 to 37</b>	32-48%	45-64%	56-74%	66-80%
<b>38 to 40</b>	24-38%	35-54%	43-62%	49-67%
<b>41 to 42</b>	16-27%	20-37%	23-43%	25-47%
<b>Over 42</b>	8-14%	10-20%	11-25%	12-29%

\* Multiple cycle fee plan is available.

### Gestational Surrogacy

Female Age	One Treatment Cycle	Two Treatment Cycles*	Three Treatment Cycles*	Four Treatment Cycles*
<b>Under 35</b>	35-56%	50-72%	63-81%	72-86%
<b>35 to 37</b>	30-47%	42-63%	53-73%	63-79%
<b>38 to 40</b>	24-39%	35-56%	42-64%	48-68%
<b>41 to 42</b>	14-25%	17-35%	19-40%	20-44%
<b>Over 42</b>	8-12%	10-17%	11-21%	12-24%

\* Multiple cycle fee plan is available.
